

Procurement of Solar Array (Supply, Install, Test and Commission of Grid-connected photo-voltaic power system) for JAIP in Jericho

LOCATION: JERICHO

OWNER: PIEFZA

FINANCE: UNDP-JAPAN GOVERNATE

CLIENT: UNDP

VALUE: \$1,700,000

STARTING ON: 2019

ENDING ON: JULY 2020

DURATION: 1.2 YEAR

PROJECT DESCRIPTION:

Procurement of Solar Array 2 MW (Supply, Install, Test and Commission of Grid-connected photovoltaic power system) for JAIP in Jericho. The project involves the installation of approximately 5800 Photovoltaic (PV) solar panels on the roof of hangers and ground, which will have an energy generation capacity of 2 MW. The proposed works include; Civil and infrastructure activities, erection of scaffolding, installation of mounting structures, PV panels, inverters and cabling, training and

commissioning.
